Jayakumar Raju

LEAD AUTOMATION AND QUALITY ASSURANCE ENGINEER

8148882906

jayakumar.raju89@gmail.com

Chennai

15 Years of experience

PROFILE SUMMARY

Experienced Selenium Automation Tester with 15 years of proven experience in manual and automated testing across banking and enterprise applications. Strong expertise in Selenium WebDriver, Core Java, BDD frameworks (Cucumber), TestNG/JUnit, CI/CD integration (Jenkins) and test management tools. Led teams to define automation strategies, integrate test suites into pipelines and improve test coverage—achieving measurable reductions in manual effort and faster releases. Skilled in test planning, regression automation, defect tracking and mentoring teams to adopt best practices.

WORK EXPERIENCE

Lead Automation and Quality Assurance Engineer

HCL Software — Nov 2021 - Present

- Led a team of 10 automation testers in designing, developing, and maintaining automated test scripts for banking applications.
- Defined and implemented a comprehensive test automation strategy, resulting in **30% reduction in manual testing efforts** and **15% increase in test coverage**.
- Collaborated with developers, business analysts, and stakeholders to ensure alignment between test efforts and business goals.
- Integrated test automation into CI/CD pipelines (Jenkins) to reduce time-to-market for new features.
- Managed creation and execution of regression test suites to ensure stability of critical business processes.
- Conducted training sessions to improve team skills and implemented robust defect tracking and reporting processes for faster issue resolution.

Senior Quality Assurance Engineer 1

Spritle Software Pvt Ltd — Jul 2020 - Nov 2021

- Developed, maintained and executed automation tests to ensure sufficient test coverage for a web-based logistics platform.
- Designed and executed Selenium automation using Java and Cucumber BDD to ensure robust testing.
- Created and maintained test cases in Zephyr and automated regression suites for quality assurance.
- Participated in automation script code reviews and promoted automation best practices; worked with CI/CD tools (Jenkins) and GitHub.

Senior Test Engineer

Tata Consultancy Services — Jan 2012 - Apr 2020

- Automated Citi credit card applications using Selenium WebDriver with Java, enhancing testing efficiency.
- Implemented BDD frameworks using Cucumber, TestNG, JUnit and Serenity BDD to improve test processes.
- Supported monthly releases, regression cycles and compliance testing; participated in sprint ceremonies and release sign-offs.
- Reviewed pull requests, addressed technical challenges, and collaborated with product owners and developers on story clarifications and defect triage.

Process Associate

Accenture Services — Jun 2010 - Dec 2012

- Handled legal summons and affidavits; entered affidavit/return of service data into Tracker system and indexed documents to correct cases.
- Raised and tracked complaints for discrepancies in legal documents and assisted

KEY SKILLS

- Selenium WebDriver
- Core Java
- Cucumber
- TestNG
- JUnit
- GitHub
- Jenkins
- Manual Testing
- Zephyr
- BDD Frameworks
- Automation Engineering
- API Testing
- ISTQB
- MySQL
- HP UFT

ACHIEVEMENTS

Achievements

Led automation initiatives that reduced manual testing efforts and improved coverage across banking applications; delivered CI/CD integrated automation suites and conducted team training to uplift test engineering capabilities.

EXTRA-CURRICULAR ACTIVITIES

Knowledge Sharing

Conducted internal training sessions and knowledge-transfer workshops on automation tools, BDD practices and CI/CD integration to uplift team capability.

subsequent processing teams.

PROJECTS

eKYC Germany and EMEa
1624 Days

- Implemented electronic Know Your Customer (eKYC) processes to verify identities remotely.
- Managed user registration, document management, data verification and consent management.
- Focused on risk assessment, reporting, compliance, data security and scalability.

DBMargin - Collateral & Payments

- Automated end-to-end payment processing and booking workflows including validations.
- Deployed Unix-based job automation solutions to increase process efficiency and validated critical reports for accuracy and timeliness.

Acquisition - CICDE web application
1308 Days

- Involved in monthly releases of the Citi credit card Acquisition app (CICD) delivering new features.
- Performed parallel system and automation testing and managed regression testing to ensure application robustness.

Sawgrass - Customer care executive tool management
578 Days

- Performed system testing and regression testing for Sawgrass applications during monthly releases.
- Migrated testing from manual to automation (UFT then Selenium) and identified/rectified bugs through the testing cycle.

New Tool Issue Trak Implementation
29 Days

- Implemented Issue Trak for order submission and tracking within the team to improve communication and submission workflows.

EDUCATION

B.C.A. | Computer Applications (General) 2010
Madras University, Chennai
Pass

CERTIFICATIONS

selenium webdriver with core java

J2EE

ISTQB Foundation Level

API Testing

GCP Associate Cloud Engineer January 2027
